COLORCATCH 3

The world's first colorimeter designed for iPod touch, iPhone and iPad.

Discover how to measure colours, transmit them via Bluetooth® to your iPod touch, iPhone and iPad, and instantly apply the true colour directly to a picture taken by an iPhone. In 3 steps and only 2 minutes, you change the colour of a building, wall, dress, object, etc...

COLORIX®

Product description

ColorCatch 3 is a digital Pocket size color detector allowing the professional to measure and match a color precisely against colour card i.e. NCS®©, RAL...

ColorCatch 3 is the first colorimeter which measures and transmits via Bluetooth® the true colour directly to an iPod touch, an iPhone or an iPad. It allows to instantly apply the true colour directly to a picture (building, wall, dress, object, etc.) taken by the iPhone. Thanks to ColorCatch 3 and Colorix.com App for iPhone it's all done in less than 2 minutes and in only 3 steps:

Step 1

Take a picture with your iPhone (building, room, etc.).

Step 2

Use ColorCatch 3 to select, measure and transmit the real colour to your iPhone or iPad. There are up to 100 colour cards available and downloadable for the ColorCatch 3 through www.colorix.com/update. For colour cards not listed, please contact us.

Step 3

Apply the selected colours into the picture on your iPhone. In less than 2 minutes you have modified your image using new colours, ready to present it to your customer, send it as e-mail to your office, order the paint or change it once again to look different.

With ColorCatch 3 and Colorix.com App for iPhone you always have the true colour at your fingertips.

Colorix.com App for iPhone contains all NCS®© and RAL CLASSIC colour references as well corresponding L*a*b*, sRGB, CMYK and LRV values.

The owners of ColorCatch 3 can download other color cards in the Colorix.com App.
